ACKNOWLEDGEMENT

First and foremost, I, represented for Team 1 of C2111L, would like to thank our Teacher – Ngo Vinh Toan, who guided us in doing these projects. He provided us with invaluable advice and helped us in difficult periods. His motivation and help contributed tremendously to the successful completion of the project.

Besides, we would like to thank all the teachers who helped us by giving us advice and providing the equipment which we needed.

Also I would like to thank my family and friends for their support. Without that support we couldn't have succeeded in completing this project.

At last but not in least, we would like to thank everyone who helped and motivated us to work on this project.

1. Problem Definition

1.1. Problem Abstraction

In 1971, Chic Lighting & Design was operated. For today's eclectic environments, we provide one-of-a-kind lighting and accessories in the most beautiful traditional and sophisticated contemporary styles. An online store called Chic Lighting & Design specializes in LED lights, lamps, chandeliers, and pendant lighting. Crystal chandeliers, conventional chandeliers, contemporary chandeliers, glass pendant lights, industrial and vintage pendant lights, metal pendant lights, and many more are among the selections we provide.

1.2. The Current System

These days, our needs are expanding. The need for home decoration is also one of them. So gorgeous lights are great items to make our home more beautiful. However, traveling a lot or going far is what makes it difficult for us to find and buy light bulbs. Therefore, we "group 1" will build a chic and lighting website where people can shop online without having to move. We hope that this website will contribute to everyone with quality and beautiful light bulbs

1.3. The Proposed System

in this our project we build website with some functions as follows:

- Allows users to register for an account
- Allow users to log into accounts
- Add product to cart
- Send Feedback
- Edit account (retrieve password, change password)

1.3.1. *Boundaries of the System*

Due to the limitation of time, experience and knowledge, our website still has some disadvantages:

- Can only apply COD
- No language change feature
- Search products

1.3.2. *Hardware and Software Requirement*

Hardware

- Intel Core i3/i5 Processor or higher
- 8 GB RAM or above
- Color SVGA
- 500 GB Hard Disk space
- Mouse
- Keyboard

Software

Technologies to be used:

- Frontend: HTML5, CSS, Bootstrap, JavaScript,
- Backend: PHP
- Data Store: JSON files or TXT files

2. Customer Requirements Specification

2.1. Users of the System

2.1.1. Unregistered users:

- Visit homepage
- Visit the product page
- Visit product detail page
- Visit the about page

2.1.2. Registered users:

They can access all functions just like unregistered users. In addition, they can use some additional functions:

- Add to cart, order
- Send feedback
- Change, recover password
- View profile

2.1.3. Admin:

- Product management
- Add product
- Add brand
- Order management
- User management

2.2. System functions

2.2.1. Register

- Input: The users enter their information from the keyboard
- Process: The user's information will be inserted into the table in the database
- Output: The user's screen will switch to the home page

2.2.2. Login

- Input: The users enter their account name and password from the keyboard
- Process: If the correct username and password exist in the database, switch to the home page. Otherwise, error message will appear on screen
- Output: The user's screen will switch to the home page

2.2.3. Log out

- Input: The users click on the log out button
- Process: session will be terminated
- Output: The user's screen will switch to the home page

2.2.4. Feedback

- Input: The users enter their feedback
- Process: insert user's feedback into database
- Output: The page will reload

2.2.5. Change Password

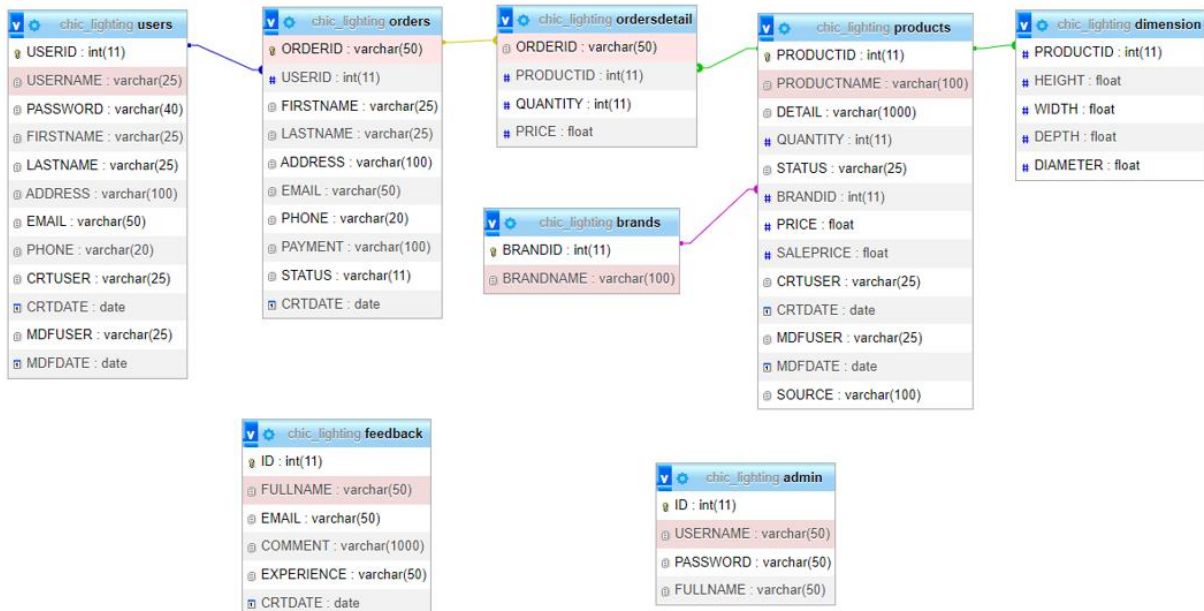

- Input: The users enter the old and new password
- Process: Update the table in database
- Output: Print the message of successful password change on the screen

2.2.6. Add to cart

- Input: The users click on the Add to Cart button
- Process: Insert into the table in database
- Output: Show the cart

When admin doesn't enter anything

The image shows a login form with two input fields: 'Username' and 'Password'. The 'Username' field contains the text 'ftytyyt'. Below both fields, the text 'Wrong username or password' is displayed in red. A green 'Login' button is positioned below the password field. At the bottom of the form, the text 'Copyright © Team-1 E-PROJECT' is visible. Two blue arrows originate from a green oval containing the text 'When admin enters wrong username or password'. One arrow points to the 'Username' input field, and the other points to the 'Password' input field.

Index

The image displays a dashboard interface for a user named 'Nguyen Hoang Nam'. The top navigation bar includes 'Home' and 'Web' links. The main content area is titled 'Dashboard' and features three prominent cards: '1500\$ Last Month Sales' (teal), '53% Bounce Rate' (green), and 'User Registrations' (yellow). Each card has a 'More info' link with an external icon. A dark sidebar on the left contains a 'MENU' section with links to 'PRODUCT', 'ADD PRODUCT', 'ADD BRAND', 'ORDER MANAGEMENT', and 'USER MANAGEMENT', each accompanied by a small icon. A red 'LogOut' button is located at the bottom of the sidebar. A green oval with the text 'Admin can access the index page only when logged in' is positioned in the top right corner. Another green oval with the text 'Link to another page with each function' is placed over the menu items, with blue arrows pointing from the oval to each of the five menu links. A third green oval with the text 'Click to Log Out' is located below the sidebar, with a blue arrow pointing to the 'LogOut' button.

Edit product

Add product

The image displays three sequential screenshots of the 'Add Product' web form, illustrating the user flow and validation logic.

Screenshot 1: Initial Form State

The form is titled 'Add Product' and includes a sidebar menu with options: PRODUCT, ADD PRODUCT, ADD BRAND, ORDER MANAGEMENT, and USER MANAGEMENT, along with a 'LogOut' button. The form fields are:

- Product Name :** Input field containing 'test'.
- Brand :** Dropdown menu with 'ceiling' selected.
- Price :** Input field containing '300'.
- Quantity :** Input field containing '4'.
- Status :** Input field containing 'available'.
- Sale Price :** Empty input field.
- Image :** File upload area with a 'Chọn tệp' button and the text 'Không có tệp nào được chọn'.

A green oval labeled 'admin enter new product information' points to the Product Name, Brand, Price, Quantity, Status, and Sale Price fields.

Screenshot 2: Validation Errors

The form shows validation errors for the Product Name, Price, Quantity, Status, and Sale Price fields, each with a red 'Cannot empty !' message. The Brand dropdown remains 'ceiling'. A green oval labeled 'When admin doesn't enter anything' points to the Price field.

Screenshot 3: Final Submission

The form shows the final state after successful submission. The Product Name field is empty, and the Brand dropdown is 'ceiling'. The Price, Quantity, Status, and Sale Price fields are empty. The Image field shows a file named 'gallery-5.jpg' selected. The Detail field contains 'dsaasdasada'. A green oval labeled 'Click to add product' points to the 'Add product' button.
